

Ten Artists---

What artists would you choose to highlight if these were the only artists your students would ever be exposed to?

What if you had to choose 2 artists from each of the 7 continents (2 from Canada)?

What if you had to choose 2 from each century, and each continent?

What if you had to choose 2 from each of many different cultures?

What if you had to include artists of different religions?

What if you had to choose a man and a woman from each continent/century/culture/religion?

What if you had to include artists that represented different biomes, whose art was a reflection of that biome?

What if you had to include artists that represented different types of weather, whose art was a reflection of those types of weather and weather systems?
